Employment

DigitalCrafts | Software Engineer | Houston, TX

January 2021 – Present

- Acquired full stack software technology proficiency through immersive, daily lectures and web application projects.
- Utilized version control workflows like branching, merging, pull requests, Trello, and the Agile Methodology, for efficient team collaborations.

Freight Cowboy | Account Executive | Houston, TX

December 2018 – August 2019

- Sold suite of web application logistics and auditing services, ranging from transactional, less-than-truckload/truckload service, to contract optimization and TMS service.
- Generated new business by means of cold calling (350+ calls per week) and assisting with app setup.

Schreiner University | Regional Enrollment Coordinator | Kerrville, TX

2014 – 2018

- Led regional recruitment efforts to bring in the largest class ever, in the university's 96-year history, in Fall 2018.
- Tripled quota (\$8.56 million in revenue) for the Rio Grande Valley, the lowest socioeconomic region of the state, in two years' time, and doubled the international student population.
- Established three satellite campuses (i.e. website design, recruitment, training) in assigned territory to meet high demand.

Projects

Personal Website: www.smithscarborough.com (for additional information and projects)

Cube News | <https://cube-news-app.netlify.app/> | <https://github.com/smithscarborough/cube-news-app>

- Serverless, RSS news aggregator application that pulls the latest, breaking stories from top media outlets around the world.
- Features categories in news, business, tech and sports.
- Built with React, React Router, Material-UI, CSS, Three.js, Context API (for optional light/dark modes) and Netlify serverless function.

Ticket Senpai | <http://ticket-senpai.herokuapp.com/> | <https://github.com/MattChale123/Ticket-Senpai>

- The Expedia of ticket purchasing applications—allows users to search once and compare ticket prices across three of the most popular ticket vendors: SeatGeek, TicketMaster and StubHub.
- Built with React, React Router, React-Bootstrap, PostgreSQL, Sequelize, Nodemon and Heroku.
- Utilizes local storage to allow users to save tickets for events that they are interested in attending.

Spotify Clone | <https://spotify-by-smith.netlify.app> | <https://github.com/smithscarborough/spotify-clone-FE>

- Value-added Spotify music player that displays the selected song's lyrics while playing the track.
- Access token for user Spotify login auto-renews one minute prior to expiration, for uninterrupted listening experience.
- Built with React, React-Bootstrap, Node.js, Express, Spotify API, CSS, Heroku and Netlify.
